RE: CITY OF HAVRE BURN SITE (Lic. No. 392) OPERATION & MANAGEMENT PLAN

Dear Mr. Peterson:

Thank you for submitting your December 18, 2003 update to the Havre Burn Site Class III (License No. 392) facility's operation and maintenance plan. Review of the update indicates that it is compliant with the solid waste management rules for Montana, and therefore is approved by the Solid Waste Program and will be incorporated into Department file records for the facility.

If you have any questions, comments, or if I can be of assistance, please do not hesitate to contact me at the Department's Permitting and Compliance Division, Solid Waste Program.

RE: City of Havre Burn Site
O&M Plan

Dear Ms O'Hern

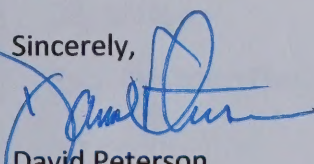

The City of is in receipt of July 19, 2013 in reference to the City of Hare's Burn Site (License #392). In the letter it was stated the most recent Operations and Maintenance (O&M) Plan on your file was dated 1995.

Enclosed for your records is a copy of a letter dated December 18, 2003 to George Scriba a Solid & Hazard Waste Specialist with your department in 2003. The letter updates the Burn Site's O&M Plan as requested by the Department in 2003. The letter also included the 1995 plan (not enclosed in this letter) which you have a copy of.

Also enclosed is a copy of a letter dated October 13, 2011 addressed to Kathleen O'Hern which addresses the updated O&M Plan.

As requested the City's O&M plan for the Burn Site (License #392) has not required updating since the October 13, 2011 Letter. If you require additional information please do not hesitate to contact my office.

Sincerely,

David Peterson

RE: City of Havre Burn Site
O&M Plan

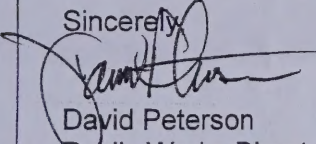

Dear Ms O'Hern

The City of Havre is in receipt of your letter dated October 11, 2011 in reference to the City of Havre's Burn Site (License #392). In the letter it was stated the most recent Operations and Maintenance (O&M) Plan in your file was dated 1995.

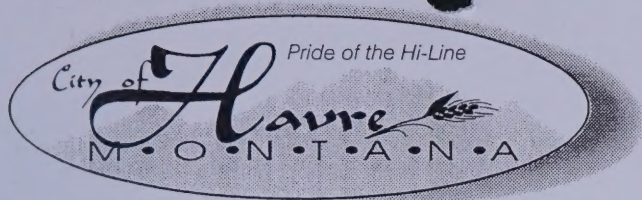

Enclosed is a copy of a letter dated December 18, 2003 to George Scriba a Solid & Hazard Waste Specialist with your department in 2005. The letter updates the Burn Site's O&M plan as requested by the Department in 2003. The letter also included the 1995 plan (not enclosed) which you have a copy of.

As requested the City's O&M plan for the Burn Site (License #392) has not required updating since the December 2003 letter. If you require any additional information please do not hesitate to contact my office

RE: Operational Plan

Dear Mr. Scriba:

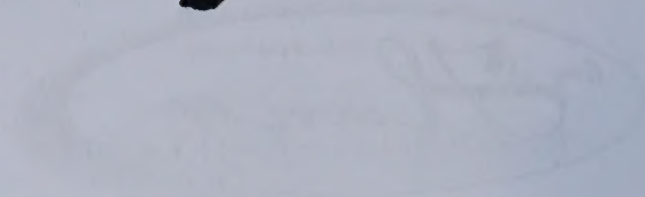

As per your request the city has updated the operational plan for our Class III Burn Site. We have incorporated the operational plan for a city use only composting. This composting area includes only the wood chips and leaves the city collects and grass collected from the city parks during the growing season. As you have seen during your inspections this area used for composting is very small and use is restricted to city use only and as stated in the operational plan is not open to the public.

Please review this plan and provide any comments that are necessary. If there are any fee increases for the permitting of the burn site please advise, as the city would need to make the increase changes for the upcoming fiscal year, which begins July 1, 2004.

If you have any questions concerning this matter, or if I can be of assistance please contact me at the Public Works Office.

Sincerely,

David Peterson
Public Works Director
City of Havre

December 18, 1902

George F. Davis
2005 & Harrison Street
St. Louis, Mo.
P.O. Box 2005

St. Louis, Mo.

Dear Mr. Davis:

As you have seen the city has adopted the proposed plan for an Olney in 1902. The plan has been adopted by the city council and the city board of health. The plan is a very good one and it is very well adapted to the city. It is a plan that will give the city a very good appearance and it will also give the city a very good health. It is a plan that will give the city a very good appearance and it will also give the city a very good health. It is a plan that will give the city a very good appearance and it will also give the city a very good health.

From the city and board of health, it is necessary to have the plan adopted by the city council and the city board of health. It is necessary to have the plan adopted by the city council and the city board of health. It is necessary to have the plan adopted by the city council and the city board of health. It is necessary to have the plan adopted by the city council and the city board of health.

It is necessary to have the plan adopted by the city council and the city board of health. It is necessary to have the plan adopted by the city council and the city board of health. It is necessary to have the plan adopted by the city council and the city board of health. It is necessary to have the plan adopted by the city council and the city board of health.

**City of Havre
Operation Plan
Class III Burn Site
License #392**

1. Responsibilities

The City of Havre Public Works Department will be responsible for the operation of the Class III burn pit site. The operation will be directed through the Public Works Director's office.

2. Operation

It is the City of Havre's intent to use this Class III Burn Site for the hauling of branches and other acceptable burnable materials and limited composting of materials hauled by city personnel. The City currently chips the majority of the branches that are hauled to the burn site and these chips are not burned. The branches are burned only when there is enough accumulation. The City also hauls leaves and grass to an area away from the burn pit. These materials are mixed with the chips and dirt to produce topsoil to be used in city projects. The city does use the chips for mulch and also allows restricted hauling of the wood chips under the supervision of public works personnel.

2. Schedule

Currently it is the intent to keep the Class III burn pit site closed to the public with limited access that will be controlled by the Public Works Department personnel. The site is fenced with barbed wire and the gate will be locked with access only by Public Works Personnel or through the Public Works Office. The Public Works Personnel will unlock the gate and monitor the site upon request of tree service or landscaping businesses or other government entities hauling acceptable burnable materials to the site.

3. Labor Requirements & Equipment Requirements

The facility will employ qualified personnel to perform all necessary functions. Once every year or as needed, an attendant(s) will burn the trees and untreated wood materials. The city will acquire an air quality permit prior to each burn, with the understanding that the burn must be completed in one day. The ashes will be removed from the pit after each burn with City equipment, placed in a covered dump truck or solid waste container and hauled to the Unified Disposal's solid waste landfill.

4. Composting/Topsoil

The City of Havre currently hauls wood chips that have been chipped by city crews along with leaves and grass that have been collected by the city during fall cleanup and deposits the materials in an area away from the burn site. The city uses these materials to mix with dirt to create topsoil that is used specifically by the City of Havre for city projects. This material is turned 3 times a year or as needed.

City of Hawaii
Honolulu, Hawaii
March 15, 1961

The City of Hawaii Public Works Department will be responsible for the operation of the plant in the future. The operation will be subject to the Public Works Director's order.

Conclusion

It is the City of Hawaii's intent to use the plant in the future for the purpose of treating the effluent from the plant and to provide a means of disposing of the effluent. The City currently owns the majority of the land on which the plant is located and has the right to use the land for the purpose of treating the effluent. The City has the right to use the land for the purpose of treating the effluent and to provide a means of disposing of the effluent. The City has the right to use the land for the purpose of treating the effluent and to provide a means of disposing of the effluent.

Recommendation

It is recommended that the City of Hawaii should acquire the land on which the plant is located for the purpose of treating the effluent. The City should acquire the land for the purpose of treating the effluent and to provide a means of disposing of the effluent. The City should acquire the land for the purpose of treating the effluent and to provide a means of disposing of the effluent.

Recommendation 2: Treatment Plant

The facility will employ qualified personnel to perform all necessary functions. The facility will be operated and maintained by the City of Hawaii. The facility will be operated and maintained by the City of Hawaii. The facility will be operated and maintained by the City of Hawaii.

Recommendation 3: Land

The City of Hawaii currently holds title to the land on which the plant is located. The City of Hawaii should acquire the land for the purpose of treating the effluent. The City should acquire the land for the purpose of treating the effluent and to provide a means of disposing of the effluent. The City should acquire the land for the purpose of treating the effluent and to provide a means of disposing of the effluent.

5. **Road Maintenance**

The City's crew will be responsible for maintaining the on-site roads at the facility. Access to the site will be via the existing City and County roads. It is anticipated that no additional impacts should occur on the access roads since the traffic using the site will be minimal.

Operations Plan
Class III Burn Site**

The City of Haver will be responsible for the operation of the Class III burn site. The operation will be directed through the Public Works Director's office.

Operation

It is the City of Haver's intent to use this Class III burn site for the burning of branches and other acceptable burnable materials and limited amount of materials handled by city personnel. The City currently chips the majority of the branches that are loaded in the burn site and these chips are not burned. The branches are burned only when there is enough accumulation. The City also hauls leaves and grass to an area away from the burn pit. These materials are mixed with the chips and dirt to produce topsoil to be used in city projects. The city does use the chips for mulch and also allows restricted burning of the wood chips under the supervision of public works personnel.

Schedule

Currently it is the intent to keep the Class III burn pit site closed to the public with limited access that will be controlled by the Public Works Department personnel. The site is fenced with barbed wire and the gate will be locked with access only by Public Works personnel or through the Public Works Office. The Public Works Personnel will unlock the gate and monitor the site upon request of use service or landscaping business or other government entities handling acceptable burnable materials to the site.

Labor Requirements & Equipment Requirements

The facility will employ qualified personnel to perform all necessary functions. Once every year or as needed, an agreement will be made with the waste and untreated wood materials. The city will acquire and air quality permit prior to each burn, with the understanding that the burn must be completed in one day. The ash will be removed from the pit after each burn with City equipment placed in a covered dump truck or solid waste container and hauled to the United Disposal's solid waste landfill.

Composting/Soil

The City of Haver currently hauls wood chips that have been chipped by city crews along with leaves and grass that have been collected by the city during fall cleanup and deposits the materials in an area away from the burn site. The city uses these materials to mix with dirt to create topsoil that is used specifically by the City of Haver for city projects. This material is turned once a year or as needed.

5. Road Maintenance

The City's crew will be responsible for maintaining the on-site roads at the facility. Access to the site will be via the existing City and County roads. It is anticipated that no additional impacts should occur on the access roads since the traffic using the site will be minimal.

Good Maintenance

2.

The City will be responsible for maintaining the on-site roads at the facility. Access to the site will be via the existing City and County roads. It is anticipated that no additional impacts should occur on the access roads since the traffic using the site will be minimal.

RE: Licensing of Class III Burn Site
City of Havre

Dear Mr. Wilbur:

As per our phone conversation of July 21st, the City of Havre has changed the method of collecting brush and branches for our Burn Site. We now chip most of the material which allows us to get a much more accurate measurement of the tonage sent to the site.

From actual net weights hauled the quantity will not exceed 200 tons per year.

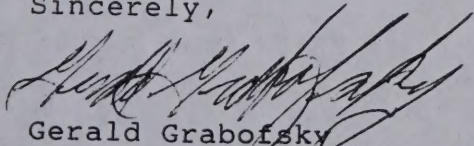

The chips will be stored and used for mulch. Storage time for any particular load will not exceed 1 year. The larger branches will be burned as explained in the permit application.

These lower quantity estimates should also lower the Annual fee.

Enclosed is your latest mailing as you requested and a copy of the map showing the location of the chip storage area.

Thank you for your assistance in this matter.

Sincerely,

Gerald Grabofsky
Director of Public Works
